Wedding Photography Collection

My Wedding Photography Collection is designed to keep things simple. Choose the amount of photography coverage that best suits your wedding day and receive your professionally edited images through a secure online gallery.

If you would like something more tangible, handcrafted albums, keepsake boxes and professional prints are available as optional add-ons, either on your initial booking or after your wedding. The latter allows you to enjoy your photographs first before deciding how you would like to preserve them for years to come.

My pricing is straightforward, transparent and flexible, allowing you to build a collection that suits you without paying for products you may not want.

Book & Secure Your Date Early

As a popular wedding photographer, my calendar fills up quickly with multiple bookings often scheduled in the same week or even over the same weekend. To ensure your date is reserved, it's essential to secure your wedding photoshoot early. This is done by choosing your preferred package and placing a 25% non-refundable deposit. Most couples tend to book well in advance, typically 4 to 18 months ahead of their special day for weddings across the Midlands. That said, I occasionally take on last-minute weddings if the date is free.
